CARMA International - Background

Founded in 1984, CARMA International emerged as the first independent media content research firm and was the genesis of media analysis services in the United States. No other company has been doing media content analysis as long as CARMA has, giving them the unrivaled knowledge and expertise that comes with time.

CARMA is a privately held company headquartered in Washington, DC, with offices in Beijing, Hong Kong, Kuala Lumpur, London, New Delhi, Paris, Sao Paulo, Shanghai, Singapore, Sydney, Tokyo, Toronto, and Wellington, NZ. This allows CARMA to span the globe in our search for news and provide the most accurate view of regional media environments. CARMA's international team can work with content in any major language. All CARMA research is conducted in the original language of publication, not through evaluation of translations or abstracts. Research is conducted in-region, by trained analysts who understand the nuances of the regional media setting. With CARMA research, nothing gets "lost in translation."

Over the past 24 years, CARMA has worked with approximately 300 clients, spanning every sector of business.

CARMA's research methodology is unmatched in the industry. Analysis of each article by the expert research team captures the nuances of media coverage – tone, bias, sarcasm, context and messages– that automated computer-based systems miss.

Combining CARMA's media analysis expertise with innovative technology and proven methodology, CARMA's media measurement programs enables clients to successfully evaluate overall media image, brand recognition, message penetration, competitive positioning, areas of strength and weakness, and much more. CARMA's insights provide meaningful data for improving communications strategy and illustrating PR effectiveness.

CARMA's media measurement serves as (1) an evaluation tool to measure the effectiveness and impact of a company's media communication; and (2) a strategic tool to gain insight into issues, trends and competitors reported on in the media. These tools create actionable intelligence that enables clients to proactively adjust their communications strategy and increase its effectiveness.
